

# Eco Scavenger Hunts

**Eco Scavenger Hunts** are citizen science activities that motivate the community to observe and collect data about the species in the **Meewasin Valley** for future conservation efforts.

These hands-on, interactive events greatly support Meewasin in the ongoing journey to understanding what species benefit from the Meewasin Valley and natural areas around the City of Saskatoon.

## iNaturalist

**iNaturalist** is a global database that locates, maps and tracks species that can be used in scientific research and increases the amount of data we have on life on our planet. Your nature findings assist Meewasin's stewardship efforts and help to create better wildlife management plans!

Download iNaturalist by scanning the QR Code or by visiting [www.iNaturalist.ca](http://www.iNaturalist.ca)

Build your nature knowledge and share your nature findings on social media by tagging **Meewasin** for a chance to win!

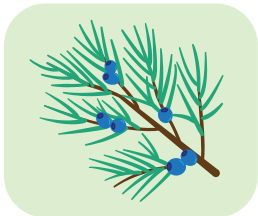

Visit [meewasin.com](http://meewasin.com) to stay up to date with Meewasin's organized group Eco Scavenger Hunts or to find additional resources to DIY!
